Carcinogen: Asbestos
Carcinogen: Carbon
Carcinogen: Nickel
Carcinogen: Sulfuric acid
Carcinogen: Trichloroethylene
Carcinogen: Vinyl chloride
Compound: Carcinogen
Compound: Cancer
Hydrogen sulfide
Trichloroethylene
Chromium (respirable dust, fumes or vapors)
Lead (respirable dust, fumes or vapors)
Nickel (respirable dust, fumes or vapors)
Arsenic (soluble compounds)
Vinyl chloride
Arsenic (compounds)
Mercury (respirable dust, vapors or fumes)
Mercury (soluble compounds)
Lead (soluble compounds)
Nickel (soluble compounds)
Chromium (soluble compounds)
Cadmium (soluble compounds)
Asbestos and its forms (as dust, fibers or finished products that crumble under hand pressure)
Silicosis
Chlorotrifluoromethane (CFC-113)
Dichlorodifluoromethane (CFC-12)
Hydrochlorofluorocarbons
Chlorodifluoromethane (HCFC-22)
Cadmium (compounds)
Chromium (compounds)
Mercury (compounds)
Nickel (compounds)
Lead (compounds)
Benzene
Acrylate
Arsenic (respirable dust, fumes or fumes)
Cadmium (respirable dust, fumes or fumes)
Acetaldehyde
Formaldehyde
Methane
Carbon dioxide
Halogenated organic solvents
